

# Press Release

**I am pleased to give you the latest update from us here at PermaJet.**

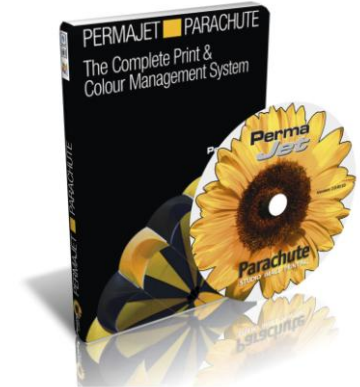

“It's true that we don't know what we've got until we lose it, but it's also true that we don't know what we've been missing until it arrives”

## **PermaJet Parachute has reopened.....**

With version 2 launched at Focus 2009, the latest Version 3 for 2010 provides the same fast and effective printing solution but with a host of upgrades, making sure you get it right first time, every time.

## **PermaJet Parachute Software has many applications and benefits:**

- Taking the pain out of dealing/understanding the printer driver software.
- The 'nesting' feature allows you to maximise the space available, moving images around to the optimised position, making the most prints of sheets/rolls.
- Five easy design steps to getting you perfect photographs.
- Bespoke design photo-pack editor to create your own template libraries.
- Get the latest updated PermaJet paper profiles free from the ftp site.
- State of the art image processing and colour management Adobe engine.
- Additional editing can be applied to images, including rotating and scaling.
- Supports all main image file types, TIFF, JPEG, PSD, and PNG.
- Support for Windows 7, Mac OSX Snow Leopard and Universal operating systems.

## **V3 Updates:**

- Now a completely dongle free solution, providing you with professional software all and authorisation software all on one disc.
- Image enhancement tools allow many post production adjustments, allowing you to create and save multiple adjustments, without saving multiple image versions. This saves crucial computer storage space and provides a bank of optional adjustments for the future.
- An exciting automated canvas wrapping feature provides a fast effective solution for canvas printers/wrappers. This new exciting easy to use feature has automated edge mirroring capabilities, allowing you to produce canvases with accurate dimensions for wrapping around stretcher bars.
- An integrated filter library and customized filter function.
- A simple text box insertion tool allows multiple details to be written and attached, including detailed EXIF data to provide effective copyright protection.
- This is a unique application programme that includes all the tools required for today's professional photographer.
- Unlike other RIP software applications this has a minimal learning curve, with a logical and easy to follow interface.
- Additional bolt-on applications for the RIP's are available, including Hot Folder and Colour Module, please see attached pdf details for full information on their function how they will benefit you.
